

# **SYSTEM, METHOD AND COMPUTER PROGRAM PRODUCT FOR FREIGHT MANAGEMENT IN A SUPPLY CHAIN FRAMEWORK**

## **ABSTRACT**

5

A system, method and computer program product are disclosed for managing freight in a supply chain management framework. A graphical user interface is utilized to display a plurality of distribution centers of a supply chain. Next, a truckload freight value is received in an input field of the graphical user interface. The truckload freight value is converted so that a supply chain analysis can then be performed using the converted truckload freight value.
